

DRIVING **HYDRAULIC** SOLUTIONS

## REALISING YOUR GOALS

...with expert product knowledge

### IMH applies decades of hydraulics and component knowledge to source quality equipment to support the efficient running of your systems.

We have a team of highly skilled engineers and technicians on hand, within our service, outages and distribution division, ready to source and supply high quality spares and components.

Keeping our customers operational with safe and efficient machinery is a high priority for us, which is why we are impartial in our approach to distributing equipment and our recommendations are based on what will best fit your needs.

We supply a range of hydraulic components to the UK and worldwide. Essentially, if there is a hydraulic need, we can support it.

ACCUMULATORS

CYLINDERS

VALVES
